

BOONKER

WARMTH · PROTECTION · SURVIVAL

CONTROLPROTEC.COM

BOONKER develops innovative modular protection cabins designed for emergency situations, power outages, extreme cold, and civil protection operations.

Our portable insulated cabins create warm and protected micro-environments with very low energy consumption. Using advanced thermal materials and optimized interior layouts, **BOONKER** solutions help families, civilians, and emergency organizations remain safe and comfortable during critical situations.

In addition, **BOONKER** develops specialized modules for shelters and civil defense infrastructures, including sanitary cabins, emergency WC solutions, and auxiliary survival spaces for rapid deployment inside bunkers and protected buildings.

Our mission is to create affordable, energy-efficient, and human-centered protection systems that combine mobility, practicality, and comfort for modern emergency preparedness.
